You: Summarize the Export Log feature

**Copilot:** The Export Log feature is a component of the IOWA project that allows for logging data to be exported based on specific criteria. Here are the key points about this feature:

- Architecture and Design:** The Export Log feature processes data as a read request from the storage engine, meaning it retrieves data without creating export files or supporting various file formats. The caller is responsible for outputting the data in a human-readable format[0].
- Data Retrieval:** Data is retrieved based on log identifiers and a specified time range. It also includes the names of logging objects for easier identification by users[1].
- Performance Considerations:** The design focuses on minimizing memory and CPU usage. The peak memory u

## **GPT-5.3 Instant Update: Improved Accuracy and Flow**

GPT-5.3 introduced more accurate responses, better web search results, and more natural conversational flow for users.

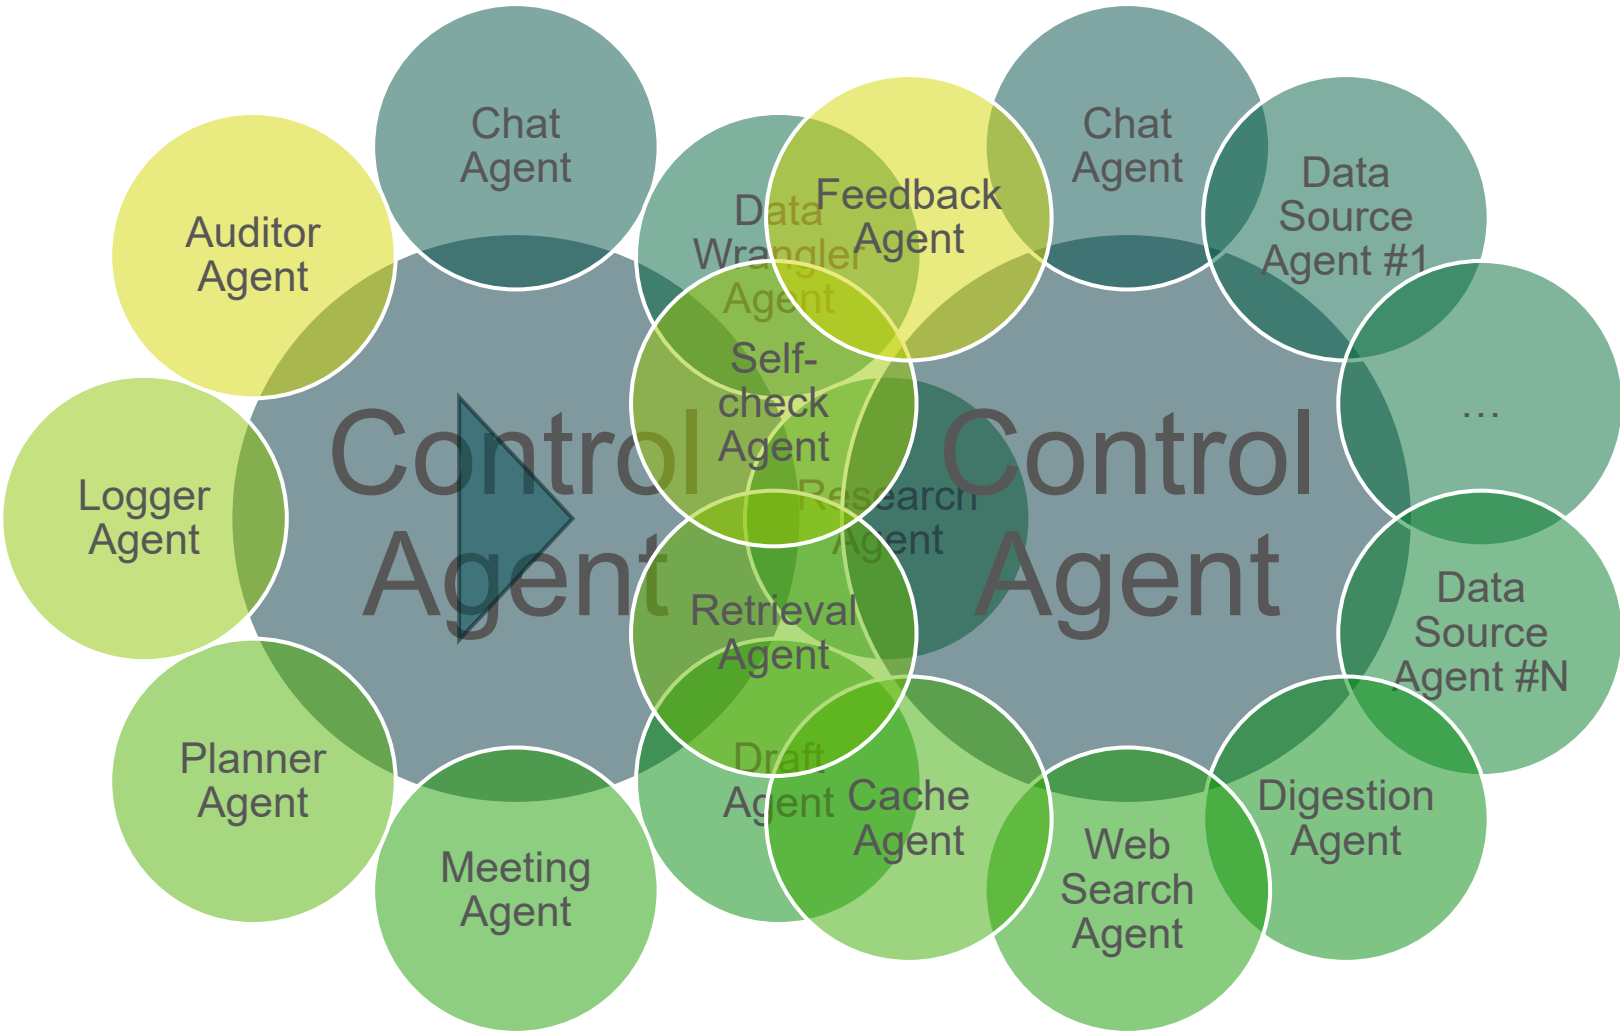

## **GPT-5.4 Thinking in ChatGPT**

Joint frontier model bringing together reasoning, coding and agentic workflows. Adjust course mid-response, better deep web search, better context maintenance.

## **Retiring GPT-5.1: Seamless Model Migration**

Older GPT-5.1 models were retired and users were automatically migrated to new versions for improved performance.

What do you know about the hungarian AIBUSINESS 2026 conference organized by ITBUSINESS?  
Web search only

AIBUSINESS 2026 (ITBUSINESS, Hungary) — web sources

- The conference framing is how AI becomes a "base layer" of enterprise operations, shifting from "AI hype" to creating measurable business value with responsible, scalable operation. <sup>[1]</sup>
- It explicitly covers regulatory environment, day-to-day use of generative AI, and how work changes as the human–algorithm boundary blurs, emphasizing that AI integration is an organizational transformation rather than a simple software rollout. <sup>[1]</sup>
- The program's stated goal is to give participants a realistic view of the strategic, cultural, and technological decisions required for AI-driven transformation. <sup>[1]</sup>
- A published schedule segment shows opening remarks by Szabó Viktória (Customer Relations Director, ITBUSINESS) and Gróf József (Content Lead, ITBUSINESS). <sup>[1]</sup>
- A listed session block includes a panel on "Generative AI in business: beyond hype, in everyday practice" (covering cases, organizational integration, constraints, ROI) and a talk titled "Software development in the age of AI – securely" by Werner Obring (Cloud Security Architect, Clico Hungary). <sup>[1]</sup>
- One web listing states the event date as **2026-04-22** and the venue as **La Vida Duna Rendezvényház**, and links to **itbusiness.hu**. <sup>[4]</sup>
